AUX

Air conditioning

Cooling in summer, heating in winter. A comfortable indoor climate all year round with an energy-efficient AUX heat-pump air conditioner. Smart to control, whisper-quiet and reliable.

AUX wall-mounted model · indoor + outdoor unit, remote control & app

COOLING

HEATING

A++ EFFICIENT

WIFI

Comfort that works all year round

A modern air conditioner is much more than cooling for a few hot days. An AUX unit is a heat pump: in summer it cools and dehumidifies your home, and in spring, autumn and winter the same unit heats quickly and efficiently. So you always have the temperature you want, at the touch of a button or via your phone.

Cooling & dehumidifying

A pleasant temperature and less humidity on hot days, fast.

Heating as a heat pump

Affordable supplementary or primary heating, even in frost.

Energy-efficient (A++)

High SEER/SCOP values: lots of comfort for little power.

Smart via WiFi & app

Control and schedule your unit anywhere with the free AC Freedom app.

Whisper-quiet

From around 22 dB(A): barely audible, even at night.

Comfortable airflow

Adjustable swing distributes the air evenly through the room.

Which capacity do you need?

Rule of thumb: the larger the room, the more capacity (kW) you need. AUX offers the wall-mounted models in 2.5 / 3.5 / 5.0 and 7.0 kW. On the following pages you will find the recommended room size per model. We calculate it exactly for your situation.

Three series, something for everyone

AUX wall-mounted models cool and heat, run on R32 and have WiFi built in. Below you can compare the key differences between the three series at a glance. Dimensions and capacities (kW) per model are on the next page.

Which AUX suits you?

	Freedom	Q-Smart	C-Smart
Level	Entry	Mid-range	Premium
Energy label cooling	A++	A++	A++
Energy label heating	A+	A+	A+
SEER (up to)	6.7	6.8	7.6
SCOP (heating)	4.0	4.0	4.2
Airflow & comfort	Standard outlet	4D Swing horizontal & vertical	Micro-perforation draft-free + 4D Swing
Air purification	Standard dust filter	UV-LED + antibacterial filter	UV-LED + antibact. & anti-mould
Self-cleaning	Basic drying the unit	Self-cleaning function	6-stage self-cleaning
Heating in extreme cold	Down to -15°C	Down to -20°C incl. Heat Belt	Down to -25°C incl. Heat Belt
Design & finish	Functional glossy white	Modern & sleek white	Premium white or black

What do these figures mean?

SEER

Seasonal Energy Efficiency Ratio: cooling efficiency across the whole season. The higher, the lower your power consumption.

SCOP

Seasonal Coefficient of Performance: heating efficiency. A SCOP of 4.0 means about 4 kWh of heat per 1 kWh of power.

A++ / A+

The energy label. AUX wall-mounted models score A++ for cooling and A+ for heating, among the most efficient classes.

Capacity & room size

Capacity	Suitable up to (volume)	Floor area*	Typical room
2.5 kW	± 90 m ³	± 35 m ²	Bedroom / small room
3.5 kW	± 120 m ³	± 46 m ²	Living room (average)
5.0 kW	± 180 m ³	± 70 m ²	Large living room / open space
7.0 kW	± 240 m ³	± 92 m ²	Very large or high room

*Floor area is a rule of thumb at approx. 2.6 m ceiling height and average insulation. With lots of glass, high ceilings or a corner/top-floor home we recommend a larger capacity. Best Aircotechniek will gladly make an exact calculation for your home.

A solution for every home

Beyond wall-mounted models

Does a wall-mounted model not fit, or do you want to cover several rooms? AUX offers more configurations. We advise what works best in your situation.

Multi-split

Multiple indoor units on one outdoor unit, ideal for several rooms.

Floor-standing

Standing unit, convenient where wall space is limited.

How it works at Best Aircotechniek

1

Free advice

We assess your situation and advise the right model and capacity.

2

Clear quote

A clear all-in price, without surprises.

3

Professional installation

Certified (F-gas) installation, neatly finished.

4

Warranty & maintenance

2-year warranty on installation and yearly maintenance available.
